

Flower Planting Schedule

This graph is only a general guide, and much depends on how much light and care you can give your seedlings. Even the traditional June 1 transplant date is variable, depending on your location, slope, and shading. In some areas of town, plants can be set out in mid-May, while residents in other parts of town should wait until June 6.

2002 Dates:	3/9	3/16	3/23	3/30	4/6	4/13	4/20	4/27	5/4	5/11	5/18	5/25	6/1
